Java Trainee · Core Java & OOP · Spring Boot · REST APIs · AI-Assisted Development

PROFESSIONAL SUMMARY

B.Sc Computer Science graduate with a strong foundation in Core Java and Object-Oriented Programming, built through formal training at JSpiders, Bangalore. Completed advanced Java Full Stack curriculum covering Spring Framework, Spring Boot, Servlets, JSP, JDBC, and SQL. Gained practical exposure to full-stack development by building and deploying projects using AI-assisted development workflows (Claude, Gemini API) — developing hands-on familiarity with REST APIs, MySQL, Spring Boot, and Git-based version control. Anthropic-certified in AI tools and fluency. Eager to learn, adapt quickly, and contribute across the software lifecycle in a structured training environment.

TECHNICAL SKILLS

Core Java & OOP: Java — OOP concepts, Collections, Exception Handling, Multithreading — studied through JSpiders training and applied in projects
Frameworks (Training-level): Spring Boot, Spring Framework, Java Servlets, JSP, JDBC — covered in JSpiders curriculum | Hibernate (basic awareness)
Databases & SQL: MySQL, Oracle SQL, SQLite — SQL queries, CRUD, joins, subqueries, normalization, DDL/DML/DQL
REST APIs & Web: Familiar with REST API concepts, HTTP methods, JSON, MVC architecture | HTML5, CSS3, JavaScript (basics), React.js (basics)
Version Control: Git, GitHub — branching, commits, repository management
AI-Assisted Development: Claude API, Google Gemini API, Prompt Engineering — Anthropic-certified | experienced in using AI tools to explore and build applications
Tools: VS Code, Eclipse IDE, Apache Tomcat, Postman, Windows, command-line tools

PROJECTS

CareerPilot AI — Full-Stack Web Application | github.com/ShivaniH23/ai-job-tracker | Live: ai-job-tracker-rho-topaz.vercel.app 2026

- Built and deployed a full-stack application using Spring Boot, React.js, and MySQL through AI-assisted development — gaining practical, hands-on exposure to REST API design, MVC architecture, JWT authentication concepts, and Spring Security across the full project lifecycle from setup through deployment.
- Explored and applied Google Gemini API and Groq Llama3 integration within the project — developed practical understanding of how external REST APIs are connected and consumed in a Java web application.
- Worked through testing, debugging, and troubleshooting cycles across multiple application modules — traced issues using logs, identified errors, and verified fixes; built a methodical approach to problem-solving in a Java stack environment.
- Developed a React.js frontend with an analytics dashboard, PDF upload functionality, and task manager — gained exposure to frontend-backend integration and how data flows across a full-stack application.

Employee Management System — Java Web Application | github.com/ShivaniH23/employee-management-system2026

- Developed a CRUD web application using Java Servlets, JSP, JDBC, and MySQL — applied J2EE technologies and MVC architecture (Controller → DAO → View) as taught in JSpiders training, with hands-on practice in writing SQL queries, managing database connections, and handling errors.
- Implemented HttpSession-based login/logout with credential validation — applied Core Java and J2EE concepts to build a working authentication mechanism and understand role-based data access.
- Wrote parameterised SQL queries and structured DAO methods for database operations — practical application of JDBC and MySQL knowledge gained through formal training.

QR Code-Based E-Voting System — Python Flask Web Application | github.com/ShivaniH23/qr-e-voting-system2025

- Built a web application with OTP authentication, QR code validation, and session management using Python Flask — explored authentication and security concepts applicable to access management systems.
- Designed a normalised SQLite database schema, prepared test cases, executed manual tests, and performed root-cause analysis on defects — applied structured testing and debugging practices across the project lifecycle.

TRAINING & CERTIFICATIONS

Java Full Stack Development — Advanced Training | JSpiders, Bangalore 2025 – 2026

- Structured curriculum: Core Java → Advanced Java → JDBC → Servlets → JSP → Spring Framework → Spring Boot → SQL → HTML/CSS/JS — enterprise-level Java training with hands-on practice in coding standards, debugging, and full SDLC.

Certifications: AI Fluency: Framework & Foundations — Anthropic (2026) | Claude Code 101 & Claude Code in Action — Anthropic (2026) | NLP & Computer Vision — IBM SkillsBuild (2026) | Your Future in AI — IBM (2026)

EDUCATION

B.Sc Computer Science JSS Shri Manjunatheshwara Institute, Karnataka University	2022–2025 CGPA 8.24/10
12th (PUC) — Science Karnataka State Board	2021–2022 74.54%
10th (SSLC) Karnataka State Board	2019–2020 77.78%

ADDITIONAL INFORMATION

Languages: English (Good written and verbal) | Kannada (Native) | Hindi (Professional) **Strengths:** Fast learner | Comfortable with structured training | Strong interest in Java, software engineering, and emerging technologies.
